

NanoMagic Twin Wax

High-Tech protection wax

The high-tech conserving wax with high performance in protection, durability, deep gloss, long-term water repellence (lotus effect), easy-to-clean effect and vehicle drying without micro-beading. The use of polyfunctional reactive components in combination with care components, which bond firmly with the surfaces as a nano-network, guarantee long-lasting high-gloss protection and improved visibility during rain (no smearing). With regular use NanoMagic Twin Wax maintains and waterproofs all rubber and plastic parts as well as convertible fabric top materials and prevents fading and embrittlement. NanoMagic Twin Wax thus makes a considerable contribution to maintaining the vehicle's value. Can be used as hot, cold and foam wax (mechanically and manually). Achieves optimum results even with high conductance values of the service water and with difficult fan geometries. Optimally suited as well for biological service water treatment plants. Contains no mineral oil hydrocarbons. VDA conform to class A.

Areas of use

Gantry washing systems, wash systems, self-service carwashes, foam guns, etc.

Recommendations for use

Apply undiluted with dosing pump undiluted or in a ratio of up to 1:4. Recommended dosage per car: hot/cold wax: 12-18 ml. Foam wax: 12-18 ml. Premium wax: 15-22 ml. Self-service carwashes and manual use (low pressure and foam cannon): 1:200 to 1:500 (final dilution). VDA conform to class A.

Container

Container	Item no.
210 L	220210
20 L	220020

pH-value: 5

Warnings

Protect against frost and excessive heat.;
